Overview

The .NET Framework 2.0 Service Pack 2 provides cumulative roll-up updates for customer reported issues found after the release of the .NET Framework 2.0. In addition, this release provides performance improvements, and prerequisite feature support for the .NET Framework 3.5 Service Pack 1.

Please review the supported operating systems for this deployment package in the System Requirements section. The corresponding updates for Windows Vista and Microsoft Windows 2008 are deployed via the full .NET Framework 3.5 service pack 1.

[Top of page](#)

System Requirements

- Supported Operating Systems:** Windows Server 2003; Windows XP
- Processor:** 400 MHz Pentium processor or equivalent (Minimum); 1GHz Pentium processor or equivalent (Recommended)
- RAM:** 96 MB (Minimum); 256 MB (Recommended)

Then, you have to download its SP2: *Microsoft .NET Framework 2.0 Service Pack 2*. The URL is:
<http://www.microsoft.com/downloads/details.aspx?FamilyID=5b2c0358-915b-4eb5-9b1d-10e506da9d0f&DisplayLang=en>

Tip: *Microsoft .NET Framework 2.0* and SP2 are extremely important for new kind of software. CE

strongly recommends you to save them in your flash drive and portable hard disk. You do not have to access the Internet and download them repeatedly, if you use other computers. Many computers have not yet installed them by default.

After installation of the *Microsoft .NET Framework 2.0 SP2* platform, you can unpack the .zip file and open the folder. It has two editions: *USB* and *Installation*.

The USB edition does not require installation at all. You can simply click **CE Lock.exe** to run this software. It does not write data into Windows Registry or hard disk at all. It just runs on the memory temporarily. Besides, after closing the software, it will be totally removed from your computer.

It supports 32 and 64 bit systems at the same time.

It does not contain icons. Therefore, it uses the default icon of *Windows* operating system. Indeed, it looks ugly. You should complain about Microsoft Corporation. Note that it is not virus. You should not mistake it later. You should save it in your flash drive or portable hard disk.

The USB edition is quite useful if you use other people's computers. It is impolite to install software in computers of your friends. Similarly, you may not be allowed to install any software in office or other public computers, because these computers have been locked. You can still use this software if you use the USB edition. Definitely, to use this software, you have to persuade the owners to install the *Microsoft .NET Framework 2.0 SP2* platform first.

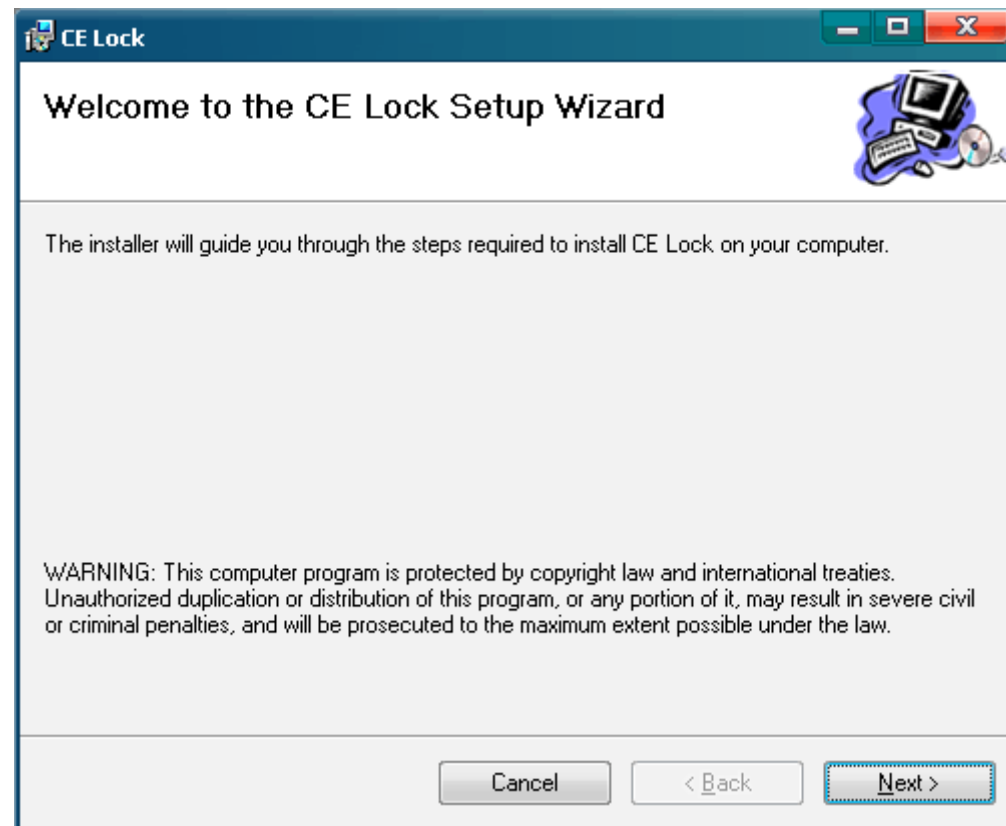

Definitely, you can install the software directly, if you are using your own computer.

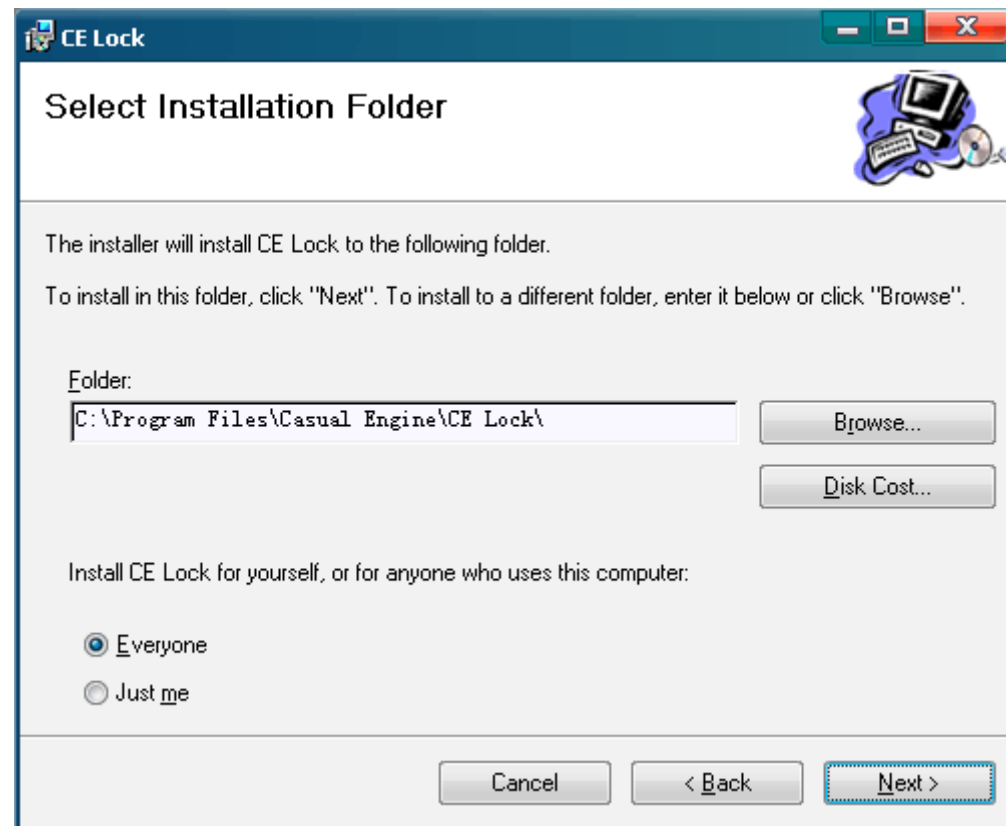

Then, you have to choose the system first. x86 means 32 bit while x64 means 64 bit.

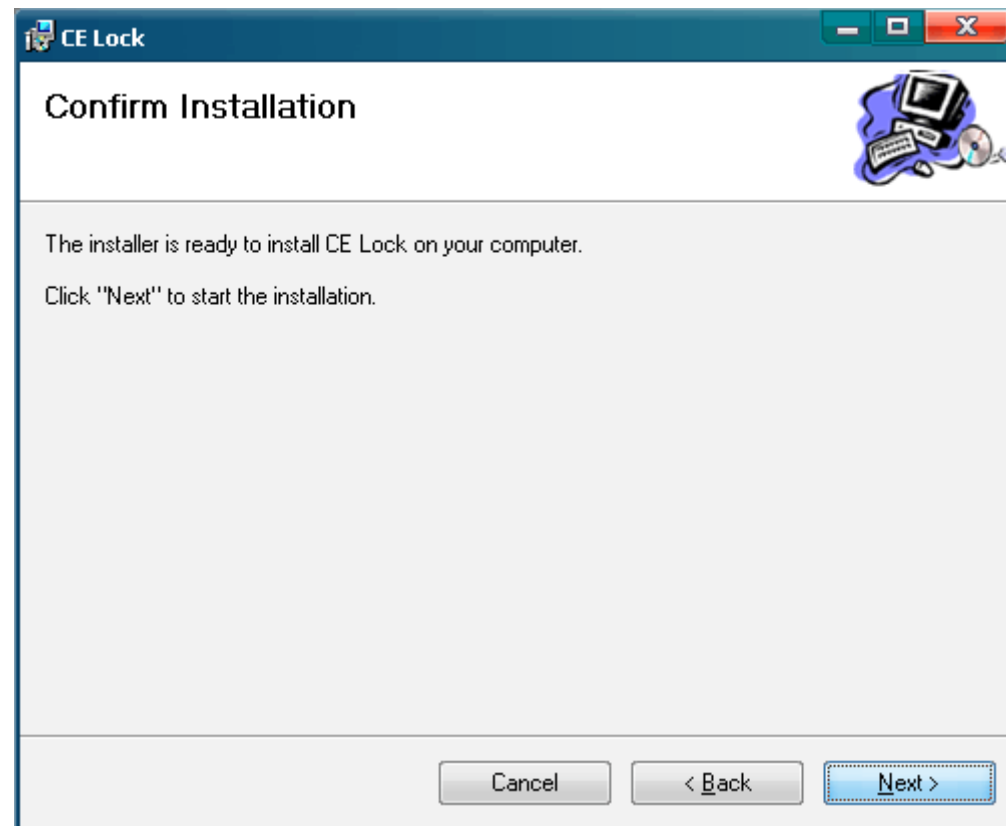

For example, you can click **Setup86.msi** to install it if your computer is 32 bit.

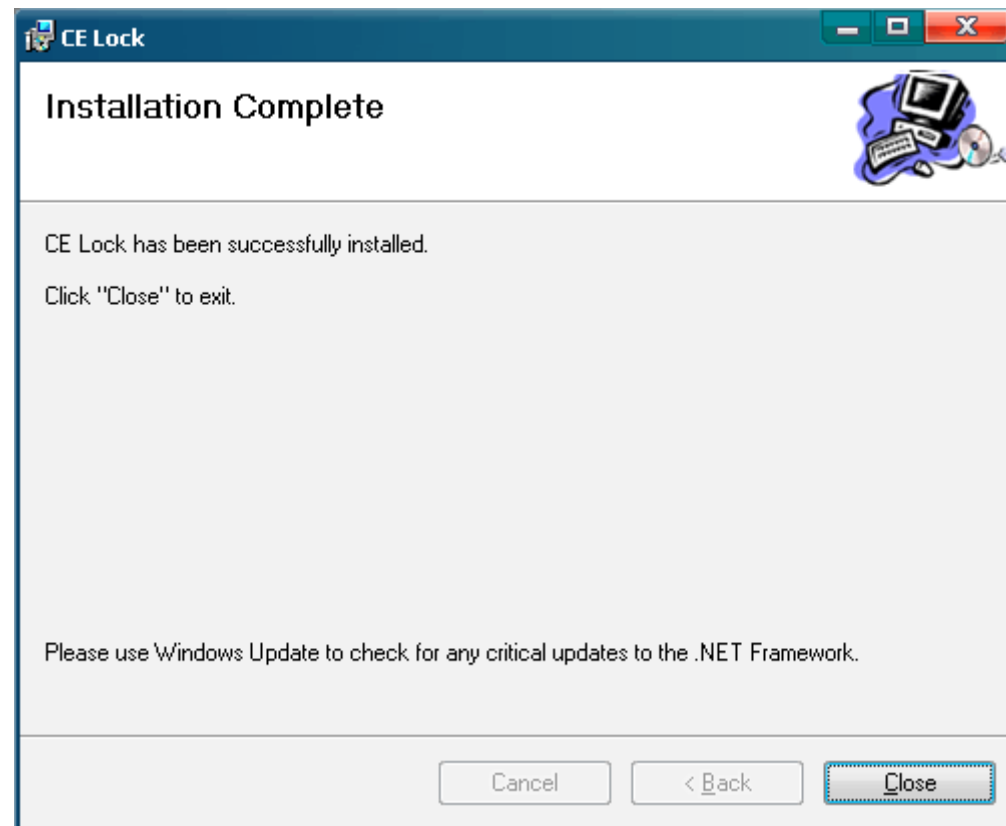

This is the wizard of installation. Click "Next" button.

Usually, you do not have to change the folder. Besides, everyone can use it by default. Click “Next” button again.

Finally, you can click "Next" button to start installation.

After installation, you can close this wizard. It has been installed in your computer successfully. You can start the software on [Start] menu.

Preface

You can lock your computer, when you leave your computer. To lock your computer, you can press **<Win+L>** key. However, this method has a terrible problem. It will lock all of your programs. For example, you are printing, using anti-virus software, downloading files from the Internet or running other programs. They may be suspend forcedly.

Definitely, you do not want to suspend programs, because you mean to use this time to drink coffee or do other personal things.

Besides, the password of your computer may be the same, if your are in office. The administrator can allocate the same password to all the computers. It means that your colleagues can still open your computer. They can see or even edit your sensitive data.

CE Lock™ comes to solve this problem. It locks your screen, but does not suspend your programs. Besides, you can use it as the second line of defense of your computer.

Start

You can start CE Lock™ on [Start] menu. It will covers the whole screen immediately.

Then, you can enter a new password to lock the screen.

Tip: You can enter one to twenty characters as your password.

Finally, you have successfully locked the screen. It is quite easy.

A person cannot see your contents, even he or she press **<Win>** key. He or she can only see the icons in taskbar.

Quit

To close the window and exit program, you just have one way: Enter the same password and press **<Enter>** key again.

Notice: You cannot close the window and exit program, even you press **<Alt+F4>** key.

You have to log off, if you forget the password. Press **<Win>** key first.

Then, click "Log Off" button. CE Lock™ will exit after you log off the computer.

Tip: After you log off, all the programs will be terminated. This is the setting of Windows operating system. You have to restart all of the programs later.

Shortcut Key

You can press shortcut keys on your keyboard. Combination keys mean that you keep pressing the first key and then press the second key. For example. **<Ctrl+A>**: Keep pressing **<Ctrl>** key and then press **<A>** key.

<Win>: Open the [Start] menu. You can use this method to log off or restart the computer, if you forget the password.

<Enter>: Lock or unlock the screen, after entering the password

Security

CE Lock™ is secure software:

It does not contain any virus, spyware, adware or advertisement. It is clean and pure software.

It does not contain any ActiveX, BHO, toolbar, or other plug-in.

It does not change the homepage or adds contents inside your browser.

It does not use third-party components. All the functions come from original codes.

It is totally offline. Anyway, it will not access the Internet for registration, verification, update, upgrade, error report or other purposes.

It does not save your password.

It does not run automatically after you start the computer.

It locks itself when running. Virus or hackers cannot use it to attack the computer.

You can install the software (Installation Edition). Definitely, it has to write basic data in the Windows Registry and hard disk. However, the data will be totally removed from Registry and hard disk after uninstallation.

Quality

CE Lock™ is high quality software:

It does not have any bug, error or loophole. From programming to testing, it has strict quality control. It uses C# 2.0 as the programming language to guarantee the security of memory when the software is running. It will never cause *Memory Leak*.

It works stably. It runs without collapse.

It works on the foreground, but does not stop your programs.

Its interface has been designed carefully. The operating system cannot be hurt even users operate this editor mistakenly and blindly.

It requires a little resources of CPU and memory.

FAQ

Q: What is the different between CE Lock™ and CE Screen™?

A: CE Screen™ just covers your screen simply, when you leave your computer. Other people can still close it and control your computer. It is suitable for secure environments. CE Lock™ totally locks your screen. Other people cannot close it or control your computer, because it requires a password. It is suitable for dangerous environments. Besides, CE Lock™ is less convenient than CE Screen™, because you have remember and enter a password each time.

Q: Does CE Lock™ record my password?

A: No. CE Lock™ is secure software. It does not record your password in the hard disk. You have to enter a new password, you restarts it each time. This is the advantage. It means that you do not have to remember the password for a long time and may forget about it.. Besides, you can use a new password with ease. Other people can hardly guess it.

Q: How to exit CE Lock™, if I forget the password?

A: You have to log off the computer in order to exit CE Lock™, if you forget your password.

Alternatively, you can restart you computer. Press **<Win>** key first, and then click the "Log Off" or "Shut Down" button.

Appendix

About log off in Windows.

Many people are not clear about log off. They do not know the different between log off and restart.

In fact, log off is just a software solution. It exits all the programs and resets its default setting. This software is called *Microsoft Windows* operating system.

Restart is quite different. It will cut off the power supply quickly. Then, it computer connects the power supply again and starts the computer within a short time. Definitely, the power supply can hurt your hardware. As a result, your computer will become old much faster, if you restart your computer frequently.

Usually, log off is much better than restart.

Note that log off has a special advantage. Many application programs have the problem of *Memory Leak*. In this case, you can log off the operating system to release the memory and get it back. Besides, you can close your Web browser, once it opens harmful Web pages and cannot run.

Epilogue

Some programs and services, such as print, installation, scanning virus or spyware, and so forth, require much time to process.

At this moment, you can use this time to do other things instead of sitting there to wait. You may need to leave your computer. Then, the security of the computer is a problem, especially when you are in restaurants or coffee houses.

CE specially creates this software to solve the problem of *Microsoft Windows* operating system. You can lock the computer, but still run the programs. It can promote your security and efficiency.

Good Luck!

About Owner

Beijing Sound & Bamboo Network Technology Service Center is a commercial organization, which works in Beijing, China. It was found on October 15, 2008. Before registration in Beijing government, its team has been researching and developing technology over three years. It professionally provides high quality network services and software products.

Currently, it has a Website, which is called *Casual Engine*. This Website specially provides offline network service. Its mission is to reduce the costs of enterprises and individuals. Besides, it creates values for them.
