

## Read First Mailit 7

Thanks for evaluating Mailit 7 – the ultimate email plug-in for FileMaker 10-17!

### Installation Instructions

Be sure to read the license agreement enclosed with this package before you start using the plug-in since you agree to the terms of the trial license agreement as soon as you start using the software.

To install the correct plug-in version of Mailit 7, open the folder "Plug-In" and choose the plug-in file from the correct sub-folder (Windows or Mac OS) according to your operating system.

Close FileMaker before installing the plug-in.

Mailit is compatible with FileMaker 10-17 Pro/Advanced/Runtime

Windows:

Copy the plug-in file to your FileMaker *Extensions* folder, which is located in your FileMaker application folder.

Mac OS: Copy the extracted plug-in file to your FileMaker *Extensions* folder, which is located in your FileMaker application folder.

After installing the plug-in please read the Manual to get started with Mailit 7.

### Server Installation Instructions

In order to run the plug-in under FileMaker Server SSS (Server Side Scripting), available since FileMaker Server 9, you should make sure the plug-in is installed in to the proper Server location:

#### **FileMaker Server 13 - 17**

Windows: \Program Files\FileMaker\FileMaker Server\Database Server\Extensions\

Mac OS: /Library/FileMaker Server/Database Server/Extensions/

Please notice, that you should "Enable the FileMaker Server to use plug-ins" , before you can enable each particular plug-in.

In order to run the plug-in under FileMaker Server IWP (Instant Web Publishing), the plug-in should be installed to:

Windows:

`\Program Files\FileMaker\FileMaker Server\Web Publishing\publishing-engine\wpc\Plugins`

Mac OS:

`/Library/FileMaker Server/Web Publishing/publishing-engine/wpc/Plugins`

Please notice, that plug-in installed in to IWP "Plugins" folder will not get shown in the FileMaker Server Console.

FileMaker Server 64 bit edition, such as FileMaker Server 13-17 require 64 bit plug-in edition. Both Mac OS X plug-ins 32 bit (x86) and 64 bit (x64) are packaged into the same binary file ( "Mailit.fmplugin" ). Windows plug-ins are shipped separately: "Mailit.fmx" is a 32 bit (x86) version and "Mailit.fmx64" is a 64 bit (x64) version.

You can find more detailed information on the plug-in installation at:

<https://fmhelp.filemaker.com/help/17/fmp/en/>

<https://fmhelp.filemaker.com/help/16/fmp/en/>

## Registration Information

Mailit is commercial shareware. You are allowed to try this FileMaker plug-in for 14 days. After that the plug-in cannot be used any longer without registration. A trial sentence will be added to every outgoing message. These restrictions will be removed as soon as you register Mailit.

New Mailit users:
