REPORT GENERATOR INSTALLATION AND ACTIVATION PROCEDURE

System Requirements

Hardware	
CPU	Pentium, compatible or upper
RAM	64 Mb
Hard Disk	200 Mb
Video	Vga or upper
Mouse	Required
CD-Rom	Recommended for installation. The installation can also be executed through the network
Software	
Operating system	Microsoft Windows 95/98/ME/NT/2000/XP
	Win NT 4.0 SP6 or upper, Internet Explorer 4.01 SP2 or upper

Installation

Insert the Report Generator CD-ROM in the CD Drive. The installation should start automatically.

 If the installation does not start automatically, from the "My Computer" folder on the desktop select the icon corresponding to CD Drive and run the Setup.exe
The first page is the installation software presentation, to proceed press Next.
The second page ask to read carefully and to accept the Licence Agreement. To install and use Report Generator it is mandatory to fully accept the licence agreement (selecting Yes).
The installation will proceed automatically. When finished, press Finish to restart the computer.

At the end of installation the new "Report Generator" folder should be present on the desktop, including the shortcuts to the manual (Acrobat .pdf format) and to Report Editor and Report Generator (runtime only) as shown in the picture below:

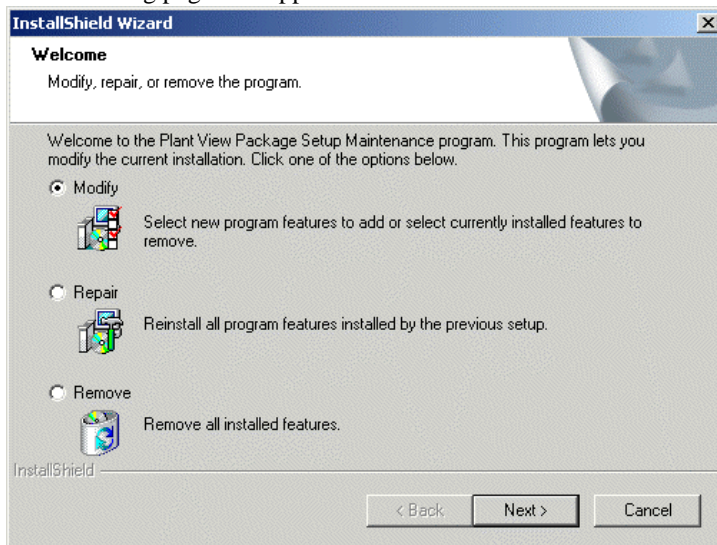

repedit

reprun

Modify or remove Report Generator

To modify or remove the application, run Setup.exe from installation CD ROM or use the Setting – Control Panel – Add/Remove programs Windows tool selecting Report Generator from the list.
The following page will appear:

Choose **Repair** to reinstall damaged components.
Choose **Remove** to completely remove the installed application .

Registration and activation

After installation, the Report Generator application runs in demo mode.
In demo mode, when Report Generator is running, some warning windows will periodically appear on the screen, advising that the Report Generator copy has NOT been activated, so it is NOT licensed and NOT free to be used until registration occurs. When the evaluation time (30 days) has expired, the application will be automatically closed. The Report Editor can still be used, but it will not be possible to switch to Run mode.
A single Report Generator copy is licensed to be installed in a workstation only. Changing computer or changing some of its components will make the licence to be invalid and a new activation should be asked to Fast Spa.

Registering your own Report Generator copy you can receive information on the product new releases and on technical assistance. The registration can be made through the form included in Report Generator package or on the web at Fast Spa site (www.fastautomation.it)
To obtain the complete activation, after Report Generator installation please get your own system key following the procedure described below, then send it to Fast Spa that will send you back the Enable Key code.
For further installation of Report Generator on the same workstation after some components changes or on other workstations, please send the new System Key code and ask Fast Spa for the new Enable Key code.

How to obtain activation code:

From the Report Generator folder present on your desktop after program installation, run Report Editor.
From the main menu, select **Tools – Licence Activation**.
The **Enable Full version** dialog box will appear as shown right here.
Please communicate the **System Key** number to Fast Spa and Fast Spa will send you back the Enable key code, to be typed in the **Enable Key** field. Then press ok and the program will be automatically activated.
