Line Item	Product ID	Description	Commercial Price (US)
1	RRE_EAL	**RRE Enterprise Application License** ▪ Includes (1) Enterprise Project ▪ Includes: (2) Concurrent (floating) User Licenses ▪ A minimum of (1) additional Project License is required	$5,800
2	RRE_PL	**RRE Project License** ▪ Includes: (2) Concurrent (floating) User Licenses	$580
3	RRE_CUL	**RRE Concurrent User License**	$125
4	RRE_AMA	**1 Year Annual Maintenance Agreement (AMA)** ▪ RRE technical support and free version upgrades for 1 year	**18% of total license price**

1. **RRE License Descriptions**

   a. **Enterprise Application License (EAL)** – The EAL is the main software license (Required), to which you add Project Licenses and Concurrent User Licenses to meet your requirements. The Enterprise License includes an Enterprise Project and two Concurrent (floating) User Licenses. The Enterprise Project is permanently positioned above all other Projects within the Enterprise.

   b. **Project License** – Project Licenses provide an independent work area within the RRE enterprise for a group of users to manage their risks independent of other Projects in the enterprise. Each Project can use its own custom Risk Matrix, drop down menu selections, Risk Triggers with automatic email notifications, and user permissions. Each Project License includes two Concurrent (floating) User Licenses.

   c. **Concurrent User License (CUL)** - CULs control the number of users that can be logged on at the same time. User Licenses "float" among any number of User Accounts and any number of Projects to which a user has been assigned permissions. You can create an unlimited number of User Accounts. If you have 10 Concurrent User Licenses, any 10 Users can log on simultaneously.

   The EAL and each Project License includes two (2) FREE Concurrent User Licenses. For example, if you purchase an EAL with three (3) Project Licenses, you also get 8 FREE Concurrent User Licenses (EAL (2) + 3 Projects (2 each = 6) = 8 Concurrent User Licenses). This means any eight (8) people you give a user account to can be logged on at the same

time. Access and permissions into individual Projects is controlled by your RRE Administrator and Project Risk Coordinators.

2. All licenses are perpetual – **NO LICENSE RENEWAL FEES**

3. Additional Project and Concurrent User Licenses can be purchased at any time. A **$100 processing fee** will be added for each additional purchase transaction.

4. The following quantity discounts may apply:

No. Project Licenses	Discount	No. Concurrent User Licenses	Discount
25-49	25%	25-49	10%
50-74	30%	50-74	25%
75 or more	40%	75 or more	35%

5. **NO SHIPPING FEES.** All software and documentation is shipped electronically.

6. **NO SALES TAX.**

7. **Installation Considerations: (Please share this information with your technical staff):**

   a. **Installation:** The person(s) installing RRE must be knowledgeable and experienced with installing and configuring Apache Tomcat (J2EE web application server) and supporting database environment. Technical support does not include assistance with establishing, configuring or troubleshooting the customer's J2EE web application and database environment.

   b. **Hardware:**

      i. Single Application Server: RRE, Apache Tomcat and database installed together.

      ii. Separate Application Server and Database Server: RRE and Apache Tomcat installed on application server and your database installed on a separate database server.

   c. **Operating System:** Windows/Windows Server 2000 or newer

   d. **J2EE Web Application Server:** Apache Tomcat version 6.0 or newer

   NOTE: RRE is not supported on MS Internet Information Services (IIS)

   e. **Compatible Databases and Drivers:**

      i. **MySQL 5.0** or later (Using the standard MySQL JDBC 3.0 driver)

      ii. **MS SQL Server 2000 or newer** (Must use free open source jTDS JDBC 3.0 driver from SourceFORGE.net)

      http://jtds.sourceforge.net

      iii. **Oracle 8i or newer** (Requires using the Oranxo JDBC 3.0 driver ($799 Web License) from i-Net Software.

      https://www.inetsoftware.de

f. **Java Environment:** Download and install the following Java software on your web application server:

- ✓ Java 2 Enterprise Edition (J2EE) version 5.0 or newer (www.oracle.com)

- ✓ Java^{TM} Advanced Imaging Binary (Release 1.1.3) "**jai-1_1_3-lib-windows-i586.exe**" located under the heading "Windows-i586" on the following Sun web page:

    https://jai.dev.java.net/binary-builds.html#Release_builds

g. **Client Platform:** RRE can be accessed from any Internet-connected system and Web browser supporting server-based J2EE (v5.0 or newer) applications. A 1024 × 768 screen resolution is recommended but not required.

h. **Printer:** In order to print Risk Radar reports, a local or network printer must be available, and applicable printer drivers must be installed.

8. **Technical Support:** The customer must have a current Annual Maintenance Agreement in place in order to receive Tier-2 RRE technical support. Technical support will assist customers with **issues that are directly related to the RRE application**. Support <u>does not include</u> assistance with establishing, configuring or troubleshooting the customer's J2EE web application and database environment.
